

# Cumulative Number of Persons Diagnosed with HIV (non AIDS) by Public Health Regions Through December 31, 2004 Tennessee Totals = 7,185

Any county reporting five (5) or more resident cases are indicated. No individual county information will be released for counties reporting 0-4 cases (denoted by an " \* "). All figures include only Tennessee resident cases (by current county of residence) and do not include residents from other states. When the current county of residence was unknown, the county of diagnosis was substituted. A total of 466 persons living with HIV (non AIDS) from other states are receiving testing, diagnostic procedures, and/or treatment in a Tennessee facility. State law T.C.A. 68-10-101 requires every physician or other person who diagnoses, treats or prescribes for a case of HIV or AIDS infection be reported to the Tennessee Department of Health. All persons initially diagnosed with HIV or AIDS on or after January 1, 1992 must be reported. For further information, contact the following individuals:

HIV Surveillance Program Contact List		
Statewide:	Thomas Shavor, Director	615/532-8506
